Dear Parents/Carers,

Re: Covid-19 Protocols

We would just like to clarify what you need to do if you think that your child has Covid-19 symptoms.

If your child has had contact with someone who has tested positive for Covid-19, they must self-isolate for 14 days from the last date of contact. Please inform the school if this is the case.

If your child is unwell and you suspect they may have symptoms of Covid-19, you must get your child tested straight away. The symptoms are a high temperature, a new and consistent cough and/or a loss of taste/smell. Melton has a walk in test centre that informs us results will be back within 36 hours.

Under Government guidelines, the School Office/Head Teacher are required to see evidence of the test result, before your child is able to return to school. If the result is negative, please bring evidence of your child's test result and your child to the School Office, as soon as possible. Once test result evidence is clarified, your child will then enter school through the front door. If your child tests positive, you should follow the 'Stay at Home: guidance for households with possible or confirmed coronavirus' as per the link below and they must continue to self-isolate for a least 10 days from the onset of their symptoms and then return to school only if they do not have symptoms.

https://www.gov.uk/government/publications/covid-19-stay-at-home-guidance

Even if your child tests negative they must be symptom free before returning to school. If your child tests negative, but still does not feel well, please keep your child off school until all symptoms have cleared up. Your child could still have another virus, such as a cold or flu – in which case it is still best to avoid contact with other people until they are better. Other members of their household can stop self-isolating.

Thank you for your co-operation.

Kindest regards, Mrs Phil Millward (Head Teacher)
